Dr. Friedman  
FDA Commissioner  
5600 Fishers Lane  
Rockville MD 20857

Re: Bio-Tech Food Labeling

Dear Commissioner Friedman:

We're not happy about all the new substances being introduced into our foods.

We want clear and accurate labeling of all foods derived from, processed with, containing or consisting of genetically engineered organisms before they are released into any and all commercial markets.

We believe that the role of the US Government should be to provide consumers with the right to make informed choices, rather than protect corporations from accountability.

Thank you.
